CIPS Digital Academy provides access to customised learning programmes in procurement and supply. It enables your organisation to develop consistency in knowledge and skills, and helps to reduce supply chain risk throughout your organisation.
How it works

1. Covering all the major procurement and supply topics

   - 1. Legal & Contracts
   - 2. Leadership
   - 3. Category Management
   - 4. Finance
   - 5. Negotiation & Influencing
   - 6. Logistics & Supply chain
   - 7. Operations
   - 8. Sourcing
   - 9. Risk Management

2. Your academy will include a variety of learning styles

   - 1. Videos
   - 2. Podcasts
   - 3. Online tutorials
   - 4. White papers
   - 5. Templates
   - 6. eLearning
   - 7. Discussion forums
   - 8. Infographics
   - 9. How-to guides

3. Personalise your online catalogue

   - with your own branding
   - and your own learning content

Hosting Options

Your CIPS Digital Academy can be hosted by us on our Learning Management System, or by your organisation.

CIPS HOSTED

- Content hosted on CIPS LMS
- Content curated into defined topic areas
- Individual user accounts for access
- User accounts renewable after 12 months
- Additional content available

CLIENT LMS ACCESS

- Access granted & content linked to your LMS
- Curated content added to your local LMS under your design parameters
- Organisational licensing model – volume based
- Minimum term of 24 months access
- Additional content available

Branding

Tailored to suit the needs of your team and organisation. Either hosting option can carry your own brand look and feel.

Reporting

A flexible and interactive reporting suite is available so that you can track individual and team progress.

Better together

CIPS group membership

Give your sourcing, procurement and supply chain team access to essential knowledge, tools, resources and networking opportunities with CIPS Group Membership.

Personalise your online catalogue

Finance
- Looks at the main financial aspects that affect supply and the cost and techniques that can be employed to cut financial spend.

Logistics & Supply Chain
- Looks at plans, design, processes and systems for improved control and improved efficiency of supply chain.

Negotiation and Influencing
- Looks at the methods associated with preparing for and carrying out commercial negotiations, whilst taking into account the external factors that can influence outcomes.
